PartnerRe Ltd. Reports First Quarter 2020 Results

- **Net loss attributable to common shareholder of \$433 million for the quarter, driven by \$610 million of unrealized losses on investments. Since the quarter-end, the Company's investment portfolio significantly recovered.**
- **Non-life combined ratio of 103.8% during the quarter, driven by P&C combined ratio of 94.3% and Specialty combined ratio of 121.1%. Life and Health profitability, including underwriting result and allocated net investment income, of \$18 million for the quarter.**
- **Strong solvency and liquidity at the end of the first quarter, with a solvency ratio estimated in excess of 250% and cash and cash equivalents of \$1.9 billion.**

PEMBROKE, Bermuda, May 7, 2020 - PartnerRe Ltd. ("the Company") today reported a net loss attributable to common shareholder of \$433 million for the first quarter of 2020, which included net realized and unrealized investment losses of \$27 million on fixed maturities and short-term investments and \$130 million of net foreign exchange gains. This compared to a net income available to common shareholder of \$497 million in the first quarter of 2019, which included net realized and unrealized investment gains on fixed maturities and short-term investments of \$280 million and \$25 million of net foreign exchange losses.

The Company incurred \$18 million of pre-tax losses from event cancellation claims associated with COVID-19 in the first quarter of 2020. PartnerRe is exposed to COVID-19 related claims across its Non-life and Life & Health segments, and the COVID-19 related losses recorded during the first quarter reflect estimates on claims incurred as of March 31, 2020. The COVID-19 crisis and its potential recessionary impacts is an ongoing event, and it is too early to quantify the full extent of its impact.

The Company is also exposed to investment risk and the first quarter results reflect \$610 million of unrealized investment losses driven by the economic impacts of widening credit spreads and declines in equity markets. The Company's solvency and liquidity remained strong at the end of the first quarter of 2020, with a solvency ratio estimated in excess of 250% and cash and cash equivalents of \$1.9 billion.

News Release

PartnerRe President and Chief Executive Officer Emmanuel Clarke commented, “The COVID-19 pandemic is a test for our industry and a reminder of the potential severity of systemic events, and the value of strong reinsurance partnerships. Our priorities in responding to the rapidly expanding COVID-19 pandemic through the first quarter have been the safety of our staff and the continuous, seamless servicing of all our business partners. I have been impressed by the speed and agility with which the PartnerRe organization worldwide has adapted to a full work from home mode, while maintaining highly responsive interaction with our business partners.”

Mr. Clarke continued: “In our first quarter, we delivered positive underwriting results in our P&C and Life & Health segments, which was offset by loss activity in our Specialty segment. I am confident that the actions we have taken throughout last year to improve our portfolio performance, combined with strong underlying rate increases in the loss affected classes, will start to show a positive impact. We continue to execute on our growth strategy for Life & Health to maintain a well-diversified and profitable book of business.”

Mr. Clarke added: “With the strength of our balance sheet and our high quality investment portfolio, we have the resilience to weather this pandemic and changed economic cycle, and we are well-positioned for the hardening of reinsurance pricing.”

Highlights for the first quarter of 2020 compared to the first quarter of 2019 are included below.

News Release

Non-Life:

- Non-life net premiums written for the first quarter of 2020 decreased 6% compared to the first quarter of 2019, driven by a 7% decrease in the P&C segment, offset by a 1% increase in the Specialty segment, reflecting the Company's focus on portfolio optimization during the January 1, 2020 renewals.
- Non-life net premiums earned for the first quarter of 2020 increased by 14% compared to the first quarter of 2019, driven by premiums earned on prior underwriting years.
- The Non-life underwriting loss was \$46 million (combined ratio of 103.8%) for the first quarter of 2020 compared to a profit of \$24 million (combined ratio of 97.7%) for the first quarter of 2019.
- The P&C segment reported a combined ratio of 94.3% for the first quarter of 2020 compared to 87.7% for the first quarter of 2019. The P&C combined ratio for the first quarter of 2020 included \$26 million (3.4 points) of favorable prior year reserve development, compared to \$49 million (7.3 points) for the first quarter of 2019.
- The Specialty segment reported a combined ratio of 121.1% for the first quarter of 2020 compared to 116.0% for the first quarter of 2019, with both periods adversely impacted by prior year reserve development of \$95 million (22.4 points) and \$38 million (10.4 points), respectively. Prior year reserve development for the first quarter of 2020 was largely exposure driven by premium increases, as well as experience driven by a mid-sized loss from a 2019 event in the property line of business. The impact of higher adverse prior year development was partially offset by an improvement in the current accident year loss ratio compared to the same period of 2019. The first quarter of 2020 included a loss of \$18 million (4.2 points) on two event cancellations related to COVID-19, compared to the first quarter of 2019 which included a loss of \$27 million (7.3 points) in the aviation line of business.

Life and Health:

- Net premiums written were up 7% and net premiums earned were up 10% for the first quarter 2020, compared to the first quarter of 2019.
- Allocated underwriting result was a profit of \$18 million in the first quarter of 2020, compared to a profit of \$30 million in the first quarter 2019. The decrease was primarily driven by a \$23 million adverse impact in the guaranteed minimum death benefits (GMDB) line of business following declines in equity markets during the first quarter of 2020, partially offset by the favorable impact of certain portfolio recaptures.

News Release

Investments:

- Net investment return in the first quarter of 2020 was a loss of \$503 million, or (2.9)%, and included net realized and unrealized investment losses of \$602 million and losses from equity method investments of \$4 million, which were partially offset by net investment income of \$103 million. This compares to a net investment return of \$600 million, or 3.6%, for the first quarter of 2019, which included net investment income of \$110 million, net realized and unrealized investment gains of \$469 million and interest in earnings of equity method investments of \$21 million. The majority of the Company's investments, including all fixed maturities, are accounted for at fair value with changes in the fair value recorded in the Consolidated Statements of Operations.
- Net investment income was down \$7 million, or 6%, for the first quarter of 2020, compared to the same period of 2019, driven by higher investment expenses, partially offset by higher gross investment income from decisions in 2019 to re-balance certain assets into higher yield per duration unit strategies.
- Net realized and unrealized investment losses of \$602 million for the first quarter of 2020 included net realized and unrealized investment losses of \$27 million on fixed maturities and short-term investments, net realized and unrealized investment losses of \$362 million on equities, and net realized and unrealized investment losses of \$213 million on other invested assets. Losses on fixed maturities and short-term investments were driven by the impact of increases in worldwide credit spreads, partially offset by decreases in world-wide risk-free rates, while losses on equities were primarily unrealized and were driven by losses in public equity funds due to decreases in world-wide equity markets. Losses on other invested assets were also primarily unrealized and were driven by unrealized losses on U.S. and European bank loans of \$168 million during the quarter, which resulted from significant widening of U.S. and European non-investment grade credit spreads. In comparison, net realized and unrealized investment gains were \$469 million in the first quarter of 2019, which included net realized and unrealized investment gains of \$280 million on fixed maturities and short-term investments, due to decreases in world-wide risk free rates and credit spreads, and \$189 million of net realized and unrealized investment gains on equities and other invested assets, primarily due gains in public equity funds.
- Losses from equity method investments was \$4 million in the first quarter of 2020, primarily driven by losses on certain real estate and private equity investments. This compared to earnings of \$21 million for the same period of 2019.
- As of March 31, 2020, reinvestment rates were 2.4% compared to the Company's fixed income investment portfolio yield of 3.1% for the first quarter of 2020.

News Release

- During the month of April 2020, the Company recorded net unrealized gains of approximately \$150 million in its fixed maturities and short-term investments portfolios. The Company also recorded approximately \$145 million of unrealized gains in public EXOR funds, recorded within Equities, and approximately \$65 million of unrealized gains in the U.S. bank loan portfolio, recorded within Other invested assets.

Other Income Statement Items:

- Expense ratio of 5.5% for the first quarter of 2020 (Other expenses of \$86 million) was down 0.9 percentage points compared to expense ratio of 6.4% (Other expenses of \$89 million) for the same period of 2019, with the decrease primarily driven by non-recurring employment related expenses incurred during the first quarter of 2019, partially offset by an increase in Life and Health expenses compared to prior year to support the organic growth of the business.
- Net foreign exchange gains were \$130 million for the first quarter of 2020, driven primarily by the appreciation of the U.S. dollar against the British pound and Canadian dollar, partially offset by the cost of hedging, compared to losses of \$25 million for the first quarter of 2019, driven by the depreciation of the U.S. dollar against these same currencies. The impact of foreign exchange in the income statement was offset by changes in the foreign currency translation adjustment, which decreased by \$114 million and increased by \$45 million in the first quarters of 2020 and 2019, respectively.
- Interest expense was \$8 million for the first quarter of 2020, compared to \$11 million for the same period of 2019. During the second quarter of 2019, the Company issued \$500 million 3.70% Senior Notes due 2029 and used the proceeds to early redeem the \$500 million 5.50% Senior Notes due 2020 in the third quarter of 2019. These transactions resulted in the lower interest expense compared to the first quarter of 2019.
- Preferred dividends of \$12 million for the first quarter of 2020 were comparable to the same period of 2019.
- Income tax benefit was \$45 million on pre-tax losses of \$467 million in the first quarter of 2020 compared to a tax expense of \$45 million on pre-tax income of \$554 million for the same period of 2019. These amounts were largely driven by the geographical distribution of pre-tax profits and losses.

News Release

Balance Sheet, Capitalization and Cash Flows:

- Total investments and cash and cash equivalents were \$16.9 billion at March 31, 2020, down 5.1% compared to December 31, 2019. The decrease to March 31, 2020 was primarily driven by the net investment return, which was a loss of \$503 million for the first quarter of 2020, and the increase in receivables for securities sold to \$349 million at March 31, 2020 from \$31 million at December 31, 2019.
- Cash and cash equivalents, fixed maturities, and short-term investments, which are government issued or investment grade fixed income securities, were \$12.9 billion at March 31, 2020, representing 77% of the total investments and cash and cash equivalents.
- The average credit rating of the fixed income portfolio was AA as of March 31, 2020. The expected average duration of the public fixed income portfolio at March 31, 2020 was 2.1 years, while the average duration of the Company's liabilities was 4.5 years.
- There were no dividends declared and paid to common shareholders in the first quarter of 2020, compared to \$80 million over the same period in 2019. In April 2020, the Company declared and paid a dividend to common shareholders of \$50 million.
- Common shareholder's equity (or book value) of \$6.0 billion and tangible book value of \$5.4 billion at March 31, 2020 decreased by 8.6% and 9.3%, respectively, compared to December 31, 2019, primarily due to the net loss attributable to common shareholder for the first quarter of 2020 and the foreign currency translation adjustment.
- Total capital was \$8.1 billion at March 31, 2020, down 6.6% compared to December 31, 2019, primarily due to the decrease in common shareholder's equity during the first quarter of 2020 and, to a lesser extent, the decrease in Euro debt from foreign exchange movements.
- Cash provided by operating activities was \$237 million for the first quarter of 2020, compared to \$92 million for the first quarter of 2019. The increase for the first quarter of 2020 over the same period in 2019 was primarily driven by increases in cash flow from underwriting operations.

(1) The intangible assets are presented in the table above net of tax of \$12 million and \$8 million at March 31, 2020 and December 31, 2019, respectively.

(2) The decrease in senior notes primarily relates to the foreign exchange impact of remeasuring the Euro debt into U.S. dollars at the balance sheet date.

(3) Non-consolidated debt issued externally related to Capital efficient notes (CENts) of \$62 million does not appear in the debt line of the Consolidated Balance Sheets, as the finance entity that issued the debt (PartnerRe Finance II Inc.) does not meet the U.S. GAAP criteria for consolidation. The Consolidated Balance Sheets include the related intercompany notes of \$70 million issued by PartnerRe U.S. Corporation to PartnerRe Finance II Inc.
